

EMSCULPT (LIKECOOL SCULPTING)

The FDA-approved in-office machine "is a first-of-its kind, non-invasive body-contouring device that uses High Intensity Focused Electro Magnetic (HIFEM) energy to activate muscle contractions," says New York-based dermatologist, Dendy Engelman, M.D., "which strengthens muscles while also creating a metabolic reaction to break down fat." No other technology has the capability to address both muscle and fat at the same time.

FOLLICEUTICALS

A hair growth supplement and a topical treatment specifically produced to prevent male pattern hair loss

REJUVENATE

WHY DO I WANT THIS FROM BRANDEISMD?

Service Offerings From
BrandeisMD

At BrandeisMD we feel that men deserve to be rewarded for their hard work and integrity. We not only understand the importance of making you feel great, but how vital it is to look as great as you feel. We offer a wide range of services to help slow down the early signs of aging and improve your appearance.

WHO CAN BENEFIT FROM RESTORE?

Men Over Age 35 Who Want To Look Their Best

WHAT SPECIFIC TREATMENTS OR TECHNOLOGIES ARE USED?

FACIAL RESURFACING

As men age, the collagen that brightens our appearance deteriorates. Sublative is a non-invasive 15-minute treatment that restores a youthful glow and smooths the texture of the skin without the pain and downtime of lasers. Sublative penetrates more deeply than creams and peels and addresses your skin's overall tone and texture more effectively than injectables. The RF energy stimulates your body to restore collagen and improve the appearance of your facial skin.

RED LIGHT LASER THERAPY (SKIN AND HAIR)

A light therapy device like a Joovv delivers red & near infrared wavelengths directly to your body with medical-grade LEDs. These photons of natural, therapeutic light produce a chemical reaction in the mitochondria of your cells that boosts energy production and regeneration.

LASER HAIR REMOVAL

Chest, back, and neck hair can be uncomfortable and unsightly. The GentleMax Pro laser removes unwanted hair efficiently and effectively on all skin types.

SKIN TAG/WART REMOVAL

We offer removal by either freezing or excision to help with those irritating bump and skin tags that have been bothering you for years, but you have never had the time or opportunity to remove.

WHAT SERVICE OFFERINGS AND CONDITIONS DOES IT TREAT?

Wrinkling, Hair Loss, Excessive Hair Growth, Belly/Body Fat, Skin Irregularities

PLATELET-RICH PLASMA FOR HAIR GROWTH

Platelet Rich Plasma is effective in treating androgenic alopecia (aka male pattern baldness). Dr. Brandeis underwent a series of four treatments one month apart and has seen a 40% increase in hair density. PRP is a natural way to stimulate the growth and maintenance of hair as you age so that you keep what you have and grow more.
